The NARK® II Patrol Kit includes 3 reagents most often used by patrol officers for presumptive drug screening: tests for cocaine, 2 for methamphetamine, and 2 for marijuana.

The NARK® II Notebook Kit provides a convenient way to incorporate presumptive test kits in the field. Rather than carry these tests loose and chance accidentally breaking them, this kit is made of hard black plastic with foam cutouts. A color chart showing the proper reactions is attached to the inside cover of the kit.

The NARK® II 12-Pak Narcotic Notebook Kit includes the 3 reagents most often used by patrol officers for presumptive drug screening: tests for cocaine, 2 for methamphetamine, and 2 for marijuana.

NARK® II PROGRESSIVE SYSTEM
SIRCHIE® offers the NARK® II Progressive System for Drug Identification. NARK® II has the capability of presumptively identifying several families of substances suspected of being abused drugs. Designed to function as a transportable narcotics laboratory, it is available for use wherever the need for its capability might arise. Each of the tests is comprised of one or more chemical reagents. When a predictable color or series of colors occur within a specific testing sequence, a positive confirmation may be presumed.

NARK® II COCAINE ID SWIPES
These convenient new Cocaine ID "Swipes" can presumptively identify cocaine from trace amounts of residue present on surfaces that have been in contact with cocaine. These 5” x 6” wipes are easy to use and results are immediate. Simply wipe the suspected surface with Cocaine ID Swipes and if cocaine is present, the swipes will turn blue.

NARK® II NARCOTICS ANALYSIS REAGENT KIT
NARK® II is a compact, convenient field test kit offering presumptive identification of the most frequently abused drugs and narcotics:

- Marijuana
- GHB
- Hashish
- THC
- Cocaine
- Crack/Freebase
- Amphetamines
- Barbiturates
- Narcotic Alkaloids
- Opium Alkaloids
- PCP
- Hallucinogens
- Heroin
- Morphine

NARK® II NOTEBOOK & PATROL KITS
The 12-Pak Narcotic Notebook Kit was designed specifically for those departments in need of a convenient way to incorporate presumptive test kits in the field. Rather than carry these tests loose and chance accidentally breaking them, this kit is made of hard black plastic with foam cutouts. A color chart showing the proper reactions is attached to the inside cover of the case. This kit contains most common tests used for presumptively identifying drugs of abuse.

The NARK® II Patrol Kit includes the 3 reagents most often used by patrol officers for presumptive drug screening: tests for cocaine, 2 for methamphetamine, and 2 for marijuana.
### SIRCHMARK™ EVIDENCE TAPE

SIRCHMARK™ Evidence Tape is made with a matte acetate base featuring a top surface that may be written on with pencil or pen. It is coated with a permanent, quick-setting acrylic adhesive that defies removal from most surfaces. To increase the tape’s ability to tear, it is perforated with 3/16” slits at 1/4” intervals. Dual-serrated tape edges add redundancy to the integrity. The tape’s top surface is printed in translucent red or blue ink, then overprinted with an opaque black identifier. The roll is 1-1/2” wide, 0.001” thick, on a 3” core and is backed with 50 lb. stock Kraft liner. Evidence tape with white strips has the same features and a 3/8” wide white strip throughout the entire length of the roll. The strip provides space to write any necessary information. It readily accepts marks from ballpoint pens. Attempts to remove SIRCHMARK™ evidence tape will cause the tape substrate to break and peel off in irregular strips. The red or blue tint and black overprint will dissolve and smear when solvents like acetone are applied – positive proof of tampering.

- **EZ50002** Transparent “Evidence”, 108’ on 1” Core
- **EZ10002** Red “Evidence”, 108’ on 1” Core

### EVIDENCE COLLECTION

#### GUN, KNIFE & RIFLE EVIDENCE BOXES

These evidence boxes are custom sized for storing items such as pistols and handguns, knives and rifles. Boxes are pre-printed on the outside for recording mandatory chain of custody and identification data. They are durable and breathable. Sold 100 each.

LATENT PRINT KITS

SIRCHIE’s Latent Print Field Kits offer a combination of many of the most widely used latent print development products available. The products in these kits are of the highest quality and are designed to best accommodate the needs and requirements of crime scene investigators. The kits vary according to the numerous functions performed by crime scene investigators and range from the very modest to very complex.

SEARCH II LATENT PRINT KIT

The SEARCH II is our most complete, compact latent print field kit. It is complete with a “search” comparison and elimination book along with the compact Flawless™ fingerprint pad. This combination kit permits the investigator to locate, develop, lift and preserve latent evidence plus take elimination fingerprints at the scene. SIRCHIE®’s best fiberglass brush is provided for each color of powder, and a large selection of fingerprint lifters included.

177L. SEARCH II Latent Fingerprint Kit $126.99

SEARCH II TACTICAL LATENT PRINT KIT

The SEARCH II is our most complete, compact latent print field kit. This kit is complete with a “search” comparison and elimination book along with the compact Flawless™ fingerprint pad. This combination kit permits the investigator to locate, develop, lift and preserve latent evidence plus take elimination fingerprints at the scene. SIRCHIE®’s best fiberglass brush is provided for each color of powder, and a large selection of fingerprint lifters included.

177L. SEARCH II Tactical Latent Print Kit $159.99

SEARCH TACTICAL BACKPACK EVIDENCE COLLECTION KIT

Our new advanced evidence collection kit contains all the essentials for processing a crime scene. Supplies for print development included in the kit are latex print powders, magnetic latex print powders including our newest magnetic latent print powder - MAGNULITE™ Fumette™ disposable iodine fuming guns, small particle reagents, adhesive side powder and more! All packed in an easy to carry tactical backpack from 5.11 Tactical. Kit includes a removable foam insert for securing and protecting powder jars. Colors: Black, Flat Earth Dark and TAC OD Green.

TLK600 SEARCH Tactical Backpack Evidence Collection Kit $504.99

PATROL LATENT PRINT KIT

This kit is ideal for the department whose patrol officer’s responsibilities include crime scene investigation as well as regular patrol duties. It comes with complete instructions.

MFC100 Patrol Latent Print Kit $33.99

EVIDENCE TECHNICIAN KIT 1

The ETK1 was designed to assist the evidence technician with basic latent print/evidence collection when at the crime scene. The kit has a wide variety of latent print powders, both regular and magnetic, to accommodate the many different surfaces a technician may encounter. The kit is complete with cyanacrylate, iodine and small particle reagent. The kit allows the technician to locate, process, collect and package all relevant evidence at the crime scene.

ETK1 Evidence Technician Kit 1 $486.99
ETK1R Consumable Refill Pack $92.99

SIRCHIE® and 5.11 Tactical have combined their knowledge and expertise to develop a new line of tactical evidence recovery kits. SIRCHIE®’s market-leading line of forensic products combined with 5.11 Tactical’s superior nylon carrying cases come together here to create forensic kits that are not only versatile and lightweight, but tough enough to withstand the rigors of any crime scene.
LATENT PRINT DEVELOPMENT

**“HI-FI” VOLCANO LATENT PRINT POWDER**

By far the most popular of our Oxide latent powders, Silk Black features micro-milling to assure the finest quality yet one of the most versatile powders available. Indestructible White is the whitest of white powders available. Its consistent quality and texture assure the best possible results on dark, non-porous surfaces. SIRCHIE® “HI-FI” Silver/Black latent print powder is a two-color powder that will contrast with any color surface. This unique formulation will develop black on light-colored surfaces and silver on dark-colored surfaces. **Silver/Black “HI-FI” Latent Print Powder, 16 oz.** BPP20116

**Silver/Black “HI-FI” Latent Print Powder, 2 oz.** SB201L

**Indestructible White “HI-FI” Powder, 2 oz.** 103L

**Silk Black “HI-FI” Powder, 2 oz.** 101L

will develop black on light-colored surfaces and silver on dark-colored surfaces. Its unique formulation will develop black on light-colored surfaces and silver on dark surfaces.

**“HI-FI” Silver/Black Latent Print Powder is a two-color powder that will contrast with any color surface.**

**MAGNETIC LATENT PRINT POWDER**

Black is our most popular powder color in magnetic form and is finely milled for outstanding quality enhancement. This easy to use powder can be utilized on a wide variety of non-porous, non-ferrous surfaces. **Indestructible White** is used in latent print processing of dark surfaces requiring contrasting powders. **Silver/Black** magnetic latent print powder will contrast with any color surface. Its unique formulation will develop black on light surfaces and silver on dark surfaces.
